The existing diversion dam, which is over 100 years old, has undergone significant deterioration, most recently during a high-flow event in 2011. The proposed new diversion dam was designed by the Green River Conservation District and the exemptee in consultation with federal and state resource agencies to ensure a continued supply of agricultural water for local irrigators, and to improve public safety and fish passage. The work would not result in any significant changes to water levels or project operation.
